MATERIAL TRADING

Thanks to our experience, connections and commercial network, Via Nova is able to supply steel in various shapes, grades and types for marine, offshore and naval applications.

Via Nova, developed a strong supply chain, composed by reliable selected suppliers thus to guarantee their customers the best quality, at the right price and in the time required. To do this, Via Nova take advantage of its agents, highly skilled in research, selection and constant monitoring of the producers.

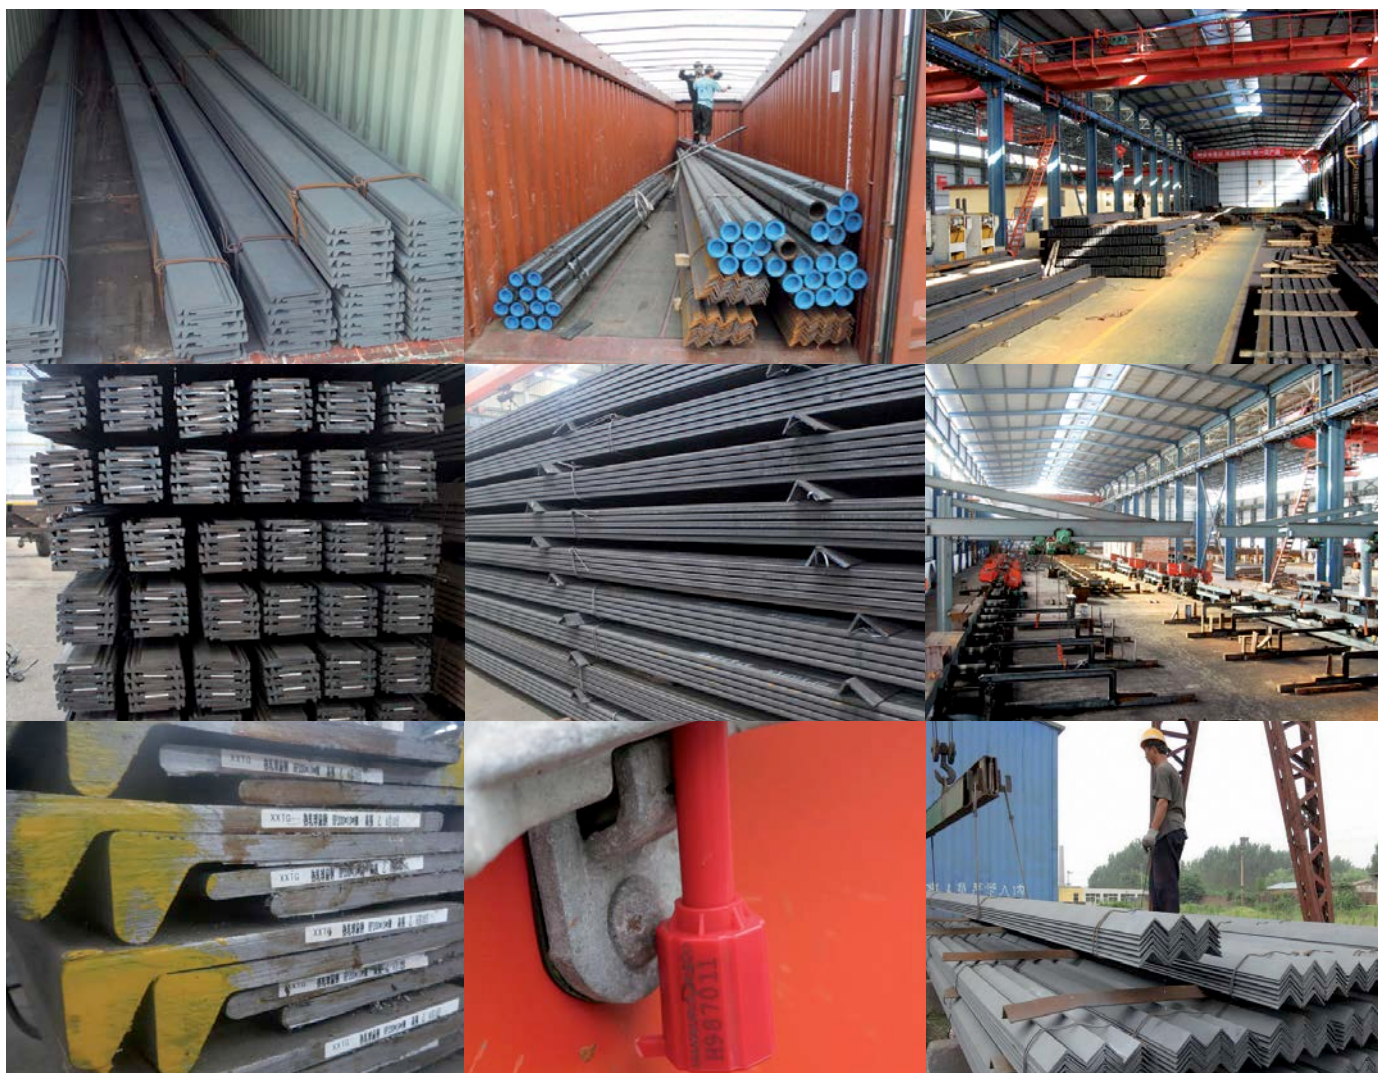

But Via Nova does not stop there, the quality control service, in fact, follows all the phases, until the container/ship loading, in order to avoid damages and ensure the full traceability of goods and the full accuracy of shipping documentation.

Via Nova usually supply:

- bulb bars;
- flat bars;
- angle bars (equal and unequal);
- round bars;
- square bars;
- beams (H-,I- and Channels);
- pipes (round, square and rectangular).

All materials above, can be supplied raw or blasted and primed and also certified by all bodies (ABS, BV, DNV, GL, LRS, RINA, RMRS, NK, IRS and CRS).

Do you have a special need or particular requirement? No problem, Via Nova will use the same network for the market research in order to find a reliable producer of same material or an equivalent alternative.
